SUMMARY

Software engineer and Linux enthusiast, specialized in web-technologies, currently working as a front-end developer.

WORK EXPERIENCE

Front-end Developer at Stradivarius — Sep 2023 - present

I worked as a front-end consultant on key pages of their international e-Commerce web platform. It set a new standard on what a professional development workflow should look like.

Front-end Developer at Axpe Consulting — Jul 2023 - present

This was my first experience on the business. I started developing JS applications with a special focus on React as a library and NextJS as a framework.

Internship as a Front End developer at Axpe — May 2023 - Jul 2023

With a curricular internship where I had the opportunity to learn the most popular web technologies.

Internship as a Java Developer at CGB — Jun 2023 - Aug 2023

– Android development with Java.
– Back-end development with Java and Springboot.

PROJECTS

Outzone Team presentation site — Link to live project

Dynamic website developed as a presentation site to the Outzone trial team. Also used as a training ground and rulebook explanation reference for Spanish cycling federation referees.

Full Stack Archetype — Link to project repo

Full stack web development archetype. Develop with security and flexibility in mind.

EDUCATION

2018 - 2023	Software Engineering Degree at **USAL**
2025	Complete SEO training course with Peter Kent at **Udemy**
2024	Advanced CSS and Sass course at **Udemy**
2023	Advanced React development course
2022	Course on Data Analysis with AI at **USAL**
2018	Cambridge English B2 Certificate (SCORE: 166/170)

SKILLS

Typescript	Learned from the best professionals to make error-free projects.
React	Refined by the requirements of high traffic e-commerce sites.
NextJS	Used as the default React framework in most of my projects.
Git	Used as the de facto version control system.
Docker	Half learnt from professionals, half self-taught.
